Menzies Institute for Medical Research

Menzies exists to perform internationally significant medical research leading to healthier, longer and better lives for Tasmanians. We aim to advance human health and wellbeing by contributing significantly to knowledge on prevention and treatment of diseases including arthritis, cancer, multiple sclerosis, eye disease, cardiovascular disease, type-2 diabetes, osteoporosis, respiratory disease, mental health and wellbeing, obesity and dementia.

Our research themes are:
- Cancer, genetics and immunology
- Cardiovascular and respiratory health and disease
- Public health and primary care
- Musculoskeletal health and disease
- Neurodegenerative diseases and brain injury
